

**EXHIBIT 1**  
**OPEN BURNING RULES AND REGULATIONS**

1. Open burning may be conducted only by individuals who are in legal control of the lot or parcel of land on which the burning will take place, or such person's authorized agent.
2. Burning will be attended continuously by a competent person of legal age, from the time of ignition until the time of extinguishment. The person responsible of any open burning must have a valid Burn Permit in their possession.
3. Open burning is not permitted when the wind speed exceeds 15 miles per hour.
4. Open burning shall not create a smoke nuisance or hazard to neighboring properties or roadways. Precautions shall be taken to ensure confinement, and limit the intensity of said burn.
5. A garden hose or other fire extinguishing equipment shall be available and in operating condition at the burn location.
6. No open burning is allowed in the same mile section as, or directly across the road from an active emergency fire scene, until the fire at the emergency fire scene has been extinguished and all fire apparatus, equipment, and personnel have left the scene.
7. Burning of certain materials is prohibited. Burning to dispose of any fossil-fuel or petrochemical based product or chemically-treated materials is strictly prohibited. Examples of such products and materials include, but are not limited to, tires, plastics goods and materials, asphalt or fiberglass-based roofing, tar paper, furniture that is stuffed with or contains foam rubber, mattresses, and treated lumber. Burning of materials containing asbestos and animal waste is also prohibited. This provision does not prohibit the reasonable use of fuels such as kerosene and diesel fuel as accelerants for the purpose of starting an open burn. Questions regarding materials that may and may not be burned in Kingman County may be directed to the local Fire Department or the Kingman County Emergency Management Director.
8. FOR NON-FIELD TYPE FIRES: Adequate clearance shall be provided from all combustibles and at least 100 feet from any structure and 10 feet from any property line.
9. FOR FIELD TYPE FIRES: There shall be a fire break (plowed, disked, or mowed) at least 25 feet wide on all sides of the area to be burned. For guidelines on burning CRP, please check on the current regulations with the local FSA office. However, CRP shall not be burned if wind speed exceeds 15 miles per hour.
10. Open burning privileges may be temporarily suspended if the resources of the Fire Services in a given area are committed. Open Burning may resume when adequate Fire Service resources are again available to respond. The Fire Chief of any fire department having jurisdiction over a particular area or district may order such suspension.
11. The Kingman County Burn Permit is subject to all requirements and restrictions of Kingman County Resolution 2013-126.
12. Open burning also is subject to all other applicable federal, state and local laws, rules and regulations.

Persons who violate the provisions of the Resolutions approved by the Board of County Commissioners of Kingman County or these Open Burning Rules and Regulations approved by the Board shall be required to reimburse the provider of fire services response at a rate of \$165 per hour for each fire truck or other required fire service response equipment.
